

Genetic Architectures III/Arquitecturas Genéticas III: New Bio & Digital Techniques/Nuevas Técnicas Biológicas y Digitales

Filesize: 9.15 MB

Reviews

This publication is definitely worth purchasing. Yes, it is actually engage in, nevertheless an amazing and interesting literature. You can expect to like just how the author write this publication.
(Odie Dicki)

GENETIC ARCHITECTURES III/ARQUITECTURAS GENETICAS III: NEW BIO & DIGITAL TECHNIQUES/NUEVAS TECNICAS BIOLOGICAS Y DIGITALES

DOWNLOAD

Lumen Books. Paperback / softback. Book Condition: new. BRAND NEW, Genetic Architectures III/Arquitecturas Geneticas III: New Bio & Digital Techniques/Nuevas Tecnicas Biologicas y Digitales, Alberto T Estevez, Bernard Cache, Josep Corco, Mauro Costa, Dennis Dollens, Genetic Architectures III / Arquitecturas Geneticas III advances from its predecessors GAI of 2003 and GAI of 2005, presenting investigative theory, production, and hybridized design from experimental architecture, biology, computation, and art history. The book features contributions from Spanish, Catalan, French, British, and American specialists in architecture, science, and philosophy: Alberto T. Estevez, Josep Corco, Dennis Dollens, Bernard Cache, Michael Hensel, Neil Leach, Agusti Fontarnau, and Judith Urbano. Their works and words are set in a framework of illustrated projects developed in the Genetic Architectures and BioDigital master program at the Universitat Internacional de Catalunya, Barcelona. The experimental research in GAIII is algorithmically generative, scripted, and parametric, stemming from collaborations between design, science, and nature--specifically between biology and architecture. Projects, illustrated with full-scale examples, are modeled and/or fabricated with CNC and rapid prototyping technologies. While some of the works and discussions are speculative and hypothetical, others focus on morphological and anatomical structural transformations fully realizable today; still others incorporate advanced visualization and techniques from science and nature that lend themselves to extrapolation for today's design studios and classrooms. Unthinkable only a few years ago, biologically living buildings or parts of buildings collaborating with sensor networks and actuator/robotic controls are the stuff of advanced experimentation and building research taking place at the Universitat Internacional de Catalunya's Barcelona campus' Genetic Architectures and BioDigital master programs.
