Not illustrated. 1906 Excerpt: .the mercury rises, establishes contact with the wire and a current which acts on the register passes; at the same time an electro magnet set in action by the same current raises for an instant the tube, the current is thereby interrupted, and the whole returns to the primitive conditions ready to receive again. Scloemilch Revealer.--This bases its action on phenomena not yet thoroughly understood, which presents itself when a very fine platinum wire serves as an anode in a voltameter, with dilute acid, to which is applied electro-motive force barely superior to that necessary to produce electrolysis. In such a case a very weak current passes, which, however, increases instantaneously when the apparatus is stricken by the electric wave. A telephone inserted in the circuit indicates by its sounds these augmentations of the intensity of the current corresponding to the arrival of the waves, and therefore serves to render the signals perceptible. ArmorTs Electro-capillary Revealer or Relay.--As this apparatus is more usually known under the name of electrocapillary relay, we shall describe it among the other relays (page 205). It has been more particularly employed in wireless telegraphy through the ground (see page 19), but according to what is said, its sensibility is sufficient to admit of its being used instead of the coherer in wireless telegraphy through space. Plache s Revealer.--As this is intended for use in telephony, we shall speak of it at Chapter XI. On the Sensibility of Revealers.--Professor Fessenden gives the...
