

Elementary Chemistry for High Schools and Academies

Filesize: 2.56 MB

Reviews

A top quality ebook and the typeface used was interesting to read through. It is rally intriguing throgh reading through period. You wont feel monotony at anytime of the time (that's what catalogues are for relating to when you ask me).

(Estelle Donnelly)

ELEMENTARY CHEMISTRY FOR HIGH SCHOOLS AND ACADEMIES

To get **Elementary Chemistry for High Schools and Academies** PDF, you should click the hyperlink beneath and save the document or have access to other information that are related to **ELEMENTARY CHEMISTRY FOR HIGH SCHOOLS AND ACADEMIES** book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: .sodium is 23 times as heavy as the atom of hydrogen, a litre of sodium vapor is only 11.5 times as heavy as a litre of hydrogen. Hence, in a litre of sodium vapor there are only half as many atoms as there are in a litre of hydrogen. But according to Avogadro's law, the number of molecules in the litre of sodium vapor is the same as the number of molecules in the litre of hydrogen; therefore, there are only half as many atoms in a molecule of sodium as there are in a molecule of hydrogen. If the hydrogen molecule is diatomic, the sodium molecule is monatomic, and so also are the molecules of potassium, zinc, and cadmium. Similar reasoning shows that the molecules of phosphorus and arsenic have twice as many atoms as the molecule of hydrogen. If hydrogen is diatomic, these elements are tetra-atomic, and the molecular weight is four times their atomic weight. 4. It will be observed that the density of any gas or vapor is numerically equal to half its molecular weight. This is due to the fact that molecular weights are expressed in terms of the weight of an atom of hydrogen, while the density is based upon the weight of a molecule of hydrogen. 5. Inasmuch as there are equal numbers of molecules in equal volumes of all gaseous substances, we may learn from an equation expressing chemical action between gases the relative volumes of each...
