# Finance and Economics Discussion Series: Cointegration Test with Stationary Covariates and the CDs-Bond Basis During the Financial Crisis

Filesize: 5.85 MB

## Reviews

*This pdf can be worthy of a read through, and superior to other. It generally does not expense excessive. Its been printed in an exceptionally simple way and it is just soon after i finished reading this ebook in which in fact modified me, change the way i really believe. (Mr. August Hermiston PhD)* 

### FINANCE AND ECONOMICS DISCUSSION SERIES: COINTEGRATION TEST WITH STATIONARY COVARIATES AND THE CDS-BOND BASIS DURING THE FINANCIAL CRISIS

To get Finance and Economics Discussion Series: Cointegration Test with Stationary Covariates and the CDs-Bond Basis During the Financial Crisis eBook, please refer to the hyperlink listed below and save the file or gain access to additional information that are have conjunction with FINANCE AND ECONOMICS DISCUSSION SERIES: COINTEGRATION TEST WITH STATIONARY COVARIATES AND THE CDS-BOND BASIS DURING THE FINANCIAL CRISIS book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.This paper proposes a residual based cointegration test with improved power. Based on the idea of Hansen (1995) and Elliott and Jansson (2003) in the unit root testing case, stationary covariates are used to improve the power of the residual based Augmented Dickey Fuller (ADF) test. The asymptotic null distribution contains difficult to estimate nuisance parameters for which there is no obvious method of estimation, therefore we propose a bootstrap methodology to obtain test critical values. Local-to-unity asymptotics and Monte Carlo simulations are used to evaluate the power of the test in large and small samples, respectively. These exercises show that the addition of covariates increases power relative to the ADF and Johansen tests, and that the power depends on the long-run correlation between the covariates and the cointegration candidates. The new test is used to test for cointegration between Credit Default Swap (CDS) and corporate bond spreads for a panel of U. S. firms during the 2007-2009 financial crisis. The new test finds stronger evidence for cointegration between the two spreads for more firms, relative to ADF and Johansen tests. This item ships from La Vergne,TN. Paperback.
